

Best practice #1

Title: Installation of Solar System in the College

Objective : To become self sufficient in electricity consumption and to make the environment eco-friendly.

Context: The solar system helps in generating the electricity . It will save the electricity bills The excess energy produced by this system will be resupplied to electricity board.On the one hand it will cut electricity expenses on the other, it will make the environment eco friendly.

Practice: The college is taking appropriate steps in maintaining the project efficiently. Proper attention is being paid to its day to day basis maintenance.

Evidence of Success: The system is functioning successfully. No major problem is encountered..

- Problems encountered: 1.Financial Constraints
2. Timely Maintenance

Best practice #2

Title: Office Automation

Objective: To ensure accuracy, to save time and to provide convenience to the students ONLINE ADMISSION PROCESS has been introduced from the session 2018-19.

Context: To enable the teaching and Non teaching staff to acquaint themselves with the latest trends and development in technology . Two Days workshop for the teaching and Non teaching staff was organised under FDP. The aim of the workshop was to train the faculty for online admission process.

Practice: The college is taking every steps to make the project successful. Online Registration has started.

Evidence of Success: The software has been installed successfully. Teaching Problems have almost been solved. No major problem was faced.

Problems Encountered:

1. Teething Problems
2. Insufficient information from applicants
3. Lack of interest among some faculty members for change
from Traditional to Digital
